innovo

Climate change is debatably the biggest challenge to face the world in the 21st century, the Race to Zero is a global campaign rallying non-state actors – including companies, cities, regions, financial, educational, and healthcare institutions – to take rigorous and immediate action to halve global emissions by 2030 and deliver a healthier, fairer zero carbon world.

> Innovo is proud to be participating in the campaign and has signed up to Business Declares as an approved partner to the campaign.

Innovo has committed to align their 2030 GHG reductions targets according to Science Based Target Initiatives (SBTi), as well as offering sustainable and low carbon solutions to our clients and working with our supply chain to assist in decarbonization.
